

FUEL TRANSFER MANAGEMENT

GPI® **G20**

CERTIFIED FUEL TRANSFER SOLUTIONS

GPI G20 Fuel Transfer Pump

GPI has long been building pumps for a variety of diesel applications and the G20 gear pump takes this a step further by being suitable for all fuelling applications in the ever changing global market. The G20 pump builds on GPI's gear pump technology and its modular yet robust design now caters for fuels other than diesel that are deemed hazardous in many markets thanks to IECEx certification.

GPI G20 Fuel Transfer Pumps

TRUE 76 LPM - 12V (DC)

SUITABLE TO BE USED WITH
Diesel, Unleaded Fuel, Jet A1
Fuel & Kerosene.

- 76 litres per min max flow rate⁽¹⁾
- Suitable to be used with Diesel, Unleaded Fuel, Jet A1 Fuel & Kerosene
- Diecast Aluminium Housing
- Rotary gear design with easy access for minimal maintenance
- Suitable for 12V DC vehicles or power supplies (includes Circuit Breaker protection and power cable)
- Modular design to accommodate filters and/or meters⁽²⁾
- Available as a complete kit or standalone pump
- IECEx EX db IIA T4 Gb certified⁽³⁾

PART NUMBER	MODEL	HOSE/NOZZLE	MOUNT	CERTIFICATION	SUCTION PIPE
